

User Analysis on AUMS

K S Santhossh

CB.EN.U4CYS21025

The AUMSCB website has a clean, modern design with a minimalistic approach. The homepage has a simple layout and the navigation is intuitive and easy to use. The top navigation bar consists of the university logo, the name of the university, and links to the different sections of the website. On the left side of the page, there is a menu bar which provides access to the university's policies, services, and some information about the student.

The website utilizes a responsive design which makes it accessible on any device. It is also optimized for mobile devices, allowing users to access the information they need without having to zoom in and out. The website also has a clean, modern design which is aesthetically pleasing and easy to navigate.

The drawbacks:

1. When the closes the website without logging out next time he enters the website first it asks for credentials and then it logs out, again asks for credentials then it logs in.
2. The small tabs which displayed for each subject is not differentia table. The names must be small and easily readable.
3. Sometimes the dropdown does not show all the contents.
4. While accessing the website using a mobile the contents are not fully displayed. Like in displaying the marks it does not show last columns.
5. When many access the website at the same time like during an exam it slows down drastically which causes a problem.
6. There is no search bar to quickly find our need.

Conclusion

The AUMSCB website is designed with a modern, minimalistic approach. The website is easy to use, intuitive, and efficient. It is also accessible to all users, and is compliant with the Web Content Accessibility Guidelines (WCAG). The

website is designed to provide a user-friendly and efficient online platform for students, faculty, and staff to access information related to the university.

There are some issues that also need to be rectified.
